Key Findings

Recommendations

Analysis Period
Jan 2021 - Dec 2023

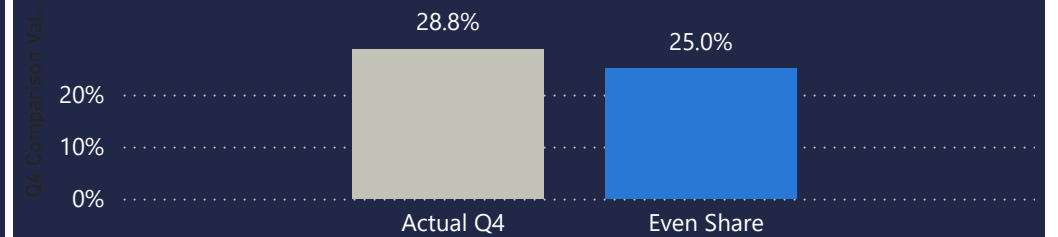

Revenue is flat, not growing

Test off-peak promotions in Q1 - Q3 to reduce dependency on the Q4 spike and smooth revenue year-round

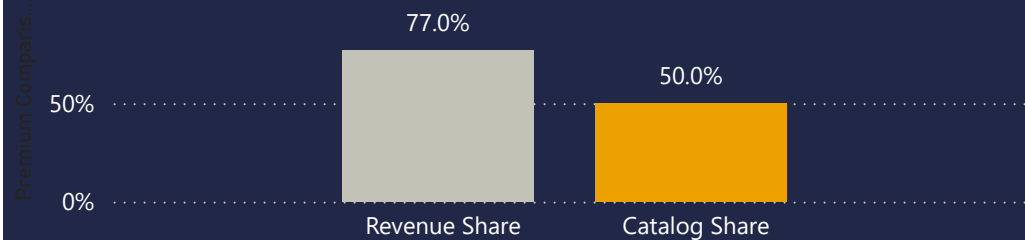

Q4 carries the business

Build inventory and staffing contingency plans specifically around Q4 concentration risk

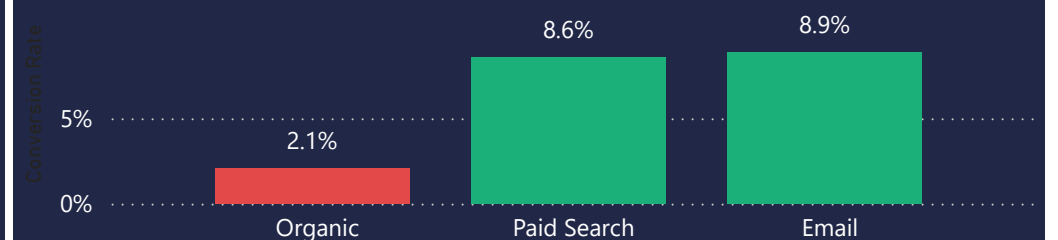

Premium pricing works

Expand premium SKUs into Fashion and Grocery, where premium presence is nearly zero today

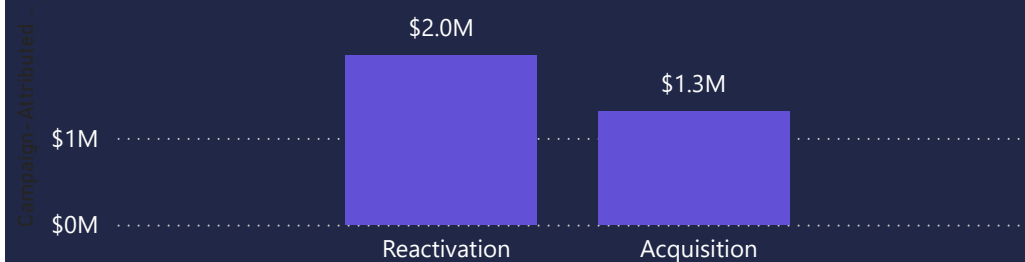

Organic traffic underperforms

Audit organic landing-page intent match; reallocate incremental spend toward Paid Search and Email

Reactivation beats Acquisition

Shift more campaign budget toward reactivation; apply its targeting logic to improve Acquisition

10% of orders never complete

Investigate checkout and data-capture failures - this is a technical issue, not a marketing one
